

Oleg Zadorozhnyi

Age 23

Education: British school, Bachelor of Computer Science in KPI

Worked as: teacher, software dev, software integrator

Opensource: 12 commits in <https://github.com/vim/vim>

OS: all major os including linux distros and bsd

Fields: math, games, networking, embedded

2021-2022

Worked in Global Logic in project called Harmonic. We were building our system contained of components as a deb packages. C++ and python. Mostly C++, python for debugging/cli tools. STL was used heavily.

2022-2024

Worked in Luxoft in project called Continental. We were supporting a lot of(4) chips for automotive(yocto). Mainly C as a programming language. Python, bash and even perl for some infrastructure. Was heavily using merge-tool and resolving hardest conflicts. DevOps activities were present.

Now I am looking for a new job. It should be offline in Kiev office. I don't have any requirements on the field. I am communicational guy. I have 3 group of 'FOP'.
